

Glueckstal Colonies

Births, Marriages & Deaths – version 2

Lutheran records: 1833-1885 (excluding 1849, 1865, 1866, 1872, 1873 & 1880)

Reformed records: 1860-1900 (excluding 1867-1874 & 1888-1896)

Included in these files are **all** birth, marriage and death records found for the Glueckstal colonies and **some** records found for Glueckstal colonists living outside the Glueckstal district for the years stated above in the St. Petersburg records. Births and marriages are combined, and deaths are shown in separate files. All these villages described here are in the vicinity of Odessa, Ukraine. This general area was often referred to as “South Russia” as it was then part of the Russian Empire. Today, these villages will carry names other than the German names given here and are no longer part of Russia. Currently, this area is in Ukraine and Transnistria. The latter is a breakaway state internationally recognized as a part of Moldova.

St. Petersburg Film. The extracted records herein are part of the St. Petersburg Consistory records that the LDS has filmed. This film can be viewed on the LDS’s genealogy site, **FamilySearch.org** – links to the film images are found to the right of each record and at the end of these files. They are explained later in this document. The births are found on *Taufen* (baptisms) registers, marriages are found in the *Getrauten* registers, and deaths are recorded in *Verstorbenen* registers.

The filmed St. Petersburg records themselves are **copies** of the original registers that were reported annually to St. Petersburg - the location of the headquarters for the Russian Protestant churches. Some years were not available and never filmed by the LDS accounting for years excluded above. Possibly these missing years are still lurking on some unknown archive shelf, no longer in any archive, or never made it to St. Petersburg in the first place. The original records from which these copies were made have never been found.

What is also important to understand is that as copies of the originals, these filmed registers contain obvious copying errors that may not have been present in the original registers. Possible errors found are noted in these files. It should also be noted that some unfound copying errors may still exist as well.

Locations/Villages. The Glueckstal district includes the initially established colonies of Glueckstal, Bergdorf, Kassel, and Neudorf. In addition to these “mother colonies,” locations include various “daughter colonies.” Daughter colonies, established later, include Klein Neudorf, Klein Bergdorf, Marienberg, Sophiental, Neu Glueckstal, and many other small villages and nearby *Chutors* (smaller rural farm communities).

Glueckstal colonists also lived in areas outside what is considered part of the Glueckstal district. Records for births, marriages, and deaths that occurred and recorded outside the Glueckstal district, but included herein, are found generally in villages that lie in the Neu Freudental parish (*Kirchspiel*), including the villages of Neu Beresina and Neu Kassel. These two villages were at times considered to be included in the Glueckstal parishes and at others outside the Glueckstal parishes. These files are only a partial listing of records found in villages outside the Glueckstal district and do not contain a complete listing of births, marriages, and deaths involving Glueckstal colonists living outside the Glueckstal district.

Note that in the birth and marriage register, the place of birth or marriage is actually rarely specifically given in the record and often needs to be inferred by the information found in the record. The location

reported in these data could be at the actual location of the birth/marriage, where the baptism occurred, where the baptism/marriage is recorded (in what village register), or the place of residence of the family. All of these locations could be in different places and are variously reported in the record. Therefore, the inference made herein, and also other earlier extractions, as to the actual location of the birth or marriage **could be wrong**.

Similarly in the death records, while the birthplace is almost always specifically recorded, the record most often does not specifically give the place of death. Therefore, the place of death often has to be inferred by using the same criteria mentioned in the preceding paragraph.

The people in these records. These German colonies comprised of ethnic Germans, of which most are of the Evangelical Lutheran faith or the Reformed Church. Settlers were most often accepted members of the community – but not necessarily living in the colony for which the family initially gained colonist status. For example, you could find in a Neudorf register a baptism for a child of a “Kassel *Ausiedler* (settler)” living in Neudorf. Some Germans living in these villages had not gained acceptance and were often referred to in the record as subjects of other lands such as Prussia, Saxony, Austria, Baden, Wurttemberg, Bavaria, France, or other states/lands. Sometimes these other lands are not given, and the family is simply referred to in the record as *Ausländer* (foreigners). It is possible some of these *Ausländer* reported in the records had never been in these other lands themselves, being a generation or two removed from the actual emigration to South Russia. Possibly the family never gained colonist status and therefore descendants of the original settlers were considered by the community subjects of these lands from which the family originally came from.

Nearly all were farmers, but the records sometimes – but not always – note that the head of the household had a special skill or occupation. Examples include a *Schmiedt* (blacksmith), *Tischler* (carpenter), *Schuhmacher* (shoemaker), *Schullehrer* (schoolteacher), *Müller* (miller), *Weber* (weaver), *Schneider* (tailor), *Stellmacher* (cartwright or maker of a cart), among others. In the majority of birth and death records, the head of the household is simply referred to as an *Ausiedler*, a *Kolonist* (colonist), or a *hiesiger Bauer* (local farmer). These sometimes are spelled out in the record, but much more often appear simply in abbreviated form: “A.” for *Ausiedler*, “K.” for *Kolonist*, or “h. B.” for *hiesiger Bauer*.

Prior Extractions. Several prior extractions have been made of these records including:

1. A team led by Dale Lee Wahl published on the Internet on the Odessa Digital Library from periods beginning 10 Jun 1995 through 18 Jan 1998. These files are still available at *Odessa3*: www.odessa3.org. This extraction, being roughly the first attempt, contains errors and omissions.
2. Another team led by Harold Ehrman performed another extraction, first published 5 Jan 1997. This extraction is also available in electronic form on *Odessa3*. While still containing errors, this extraction was an improved version.
3. Another version was published by the Glueckstal Colonies Research Association (GCRA) in two books entitled: *Glückstal Colonies Births and Marriages 1833-1900* and *Glückstal Colonies Deaths 1833-1900*. In the data below, these are referred to as “GCRA b/m” and “GCRA-d”. This third version corrects many of the errors and omissions found in the first two extractions but is in print form only and therefore cannot be digitally searched.

These files have both corrections and additional information not included in the first three extractions noted above.

How to cite this information. If the data contained herein is used, it is requested that it be cited. A suggested format for the citation is as follows:

“Glueckstal Colonies Births, Marriages, & Deaths,” *Black Sea German Research* (www.blackseagr.org), version 2, June 2023, https://www.blackseagr.org/research_church_stpetes.html.

It would be useful to also report the family group number (family #) for marriages and births or death record number (dr#) shown in these files – these items are explained below.

Corrections/changes. These are indicated in **red-bold-italic** font. Some are minor, such as slight and inconsequential spelling changes to the *Vorname* (first name) reported in prior extractions. Examples include Jacob for Jakob, Caroline for Karolina, or other similar small differences. Sometimes there is a minor problem with the date, film #, page # or reg # making it difficult to find the actual record on the old film roll. Major differences, particularly with corrections of the *Familiennname* (family name), are generally noted in the remarks. Also, in this version, the place attributed to the event has been further researched with a different interpretation and perhaps a better inference for the location when compared to the prior extractions – see location discussion above.

Records not included in prior extractions. It is believed this is a more complete reporting of the Glueckstal St. Petersburg records of interest for the years noted above. It should be noted that:

1. Each of the three prior extractions omitted some records found in one of the other prior extractions. These files attempt to make a more complete listing of these sporadically reported records, and
2. Some records were completely omitted from all three prior extractions and are included herein as noted. These are also indicated with **red-bold-italic** font.

Sorting of records, family number (family #), and death record number (dr#). In reporting of the data found in these files, it was felt that the most useful sort was based on family name. Therefore, for births, marriages, and deaths, the primary sort is the *Familiennname* explained further below.

For the birth and marriage records, an attempt to list all events with respect to a groom/bride or father/mother were grouped together, regardless of the time of the event or what village is assigned to the event. This approach was also used in GCRA b/m. However, these files provide a numbering of these families shown as family #, which is the secondary sort of after the primary sort, *Familiennname*. After this, there is tertiary sort based on the event date. Also, the groups do not always agree with GCRA b/m. These differences are generally from different interpretations of family names or possible errors that exist in GCRA b/m based on the family names.

For death records, the secondary sort is based on the status of the deceased person. This status is assigned and shown in the first column and does not always agree with the status found in the record (explained further below). Individuals are assigned to either adult or child. An adult is anyone whose reported age is eighteen or older, and anyone under eighteen who was married at the time of death (some individuals married at a very young age). A child is any unmarried person under the age of eighteen. A tertiary sort is then based on *Vornamen*.

Note that in the death records, each record is assigned a unique death record number (dr#) for purposes of referencing or citing these extractions. This number is not found in the actual records and no sort was performed on this number.

Familiennamen, Vornamen, and spellings. Unlike prior extractions, for the purposes of sorting by family, the *Familiennamen* (family name) is separated from the *Vornamen* (first names) into separate fields. Also, for sorting purposes, a standard spelling for the *Familiennamen* was adopted for all records for the family in addition to the actual spelling found in the record. The GCRA b/m and GCRA-d also use a standard spelling for the *Familiennamen*. However, the standard names in these files do not always agree with *Familiennamen* used in GCRA b/m or GCRA-d. While standard family name spellings are used for sorting, unlike what is found in GCRA b/m or GCRA-d, the actual spelling found in the record is also reported in these files if different from the adopted standard spelling. The actual spelling if different is reported below the standard spelling in *smaller italicized* font. These actual spellings for the *Familiennamen* reported in these files use the special German letters ä, ö, ü, ÿ, and ß when found in the record. The *Vornamen* spellings also report the actual spelling found in the record – but without the special letters. No attempt to standardize the *Vornamen* was made, except to convert the special letters found in the record to the English equivalent. In the *Vornamen* fields, ä is reported in these files as “ae,” ö as “oe,” ü as “ue,” ÿ as “y,” and ß as “ss.” The following is an example found in the birth and marriage extractions:

Family	<i>Familiennamen</i>	marriage (↔) or child <i>Vornamen</i>	groom (gr) or father (fa) <i>Vornamen</i>	bride (br) or mother (mo) <i>Vornamen</i>	bride (br) or mother (mo) <i>Familiennamen</i>
1681	Hinger	Jacob	Adam	Carolina	Koerner <i>Körner</i>
1681	Hinger	Katharina	Adam	Karolina	Koerner <i>Körner</i>
1681	Hinger	Friederika	Adam	Karolina	Koerner <i>Körner</i>
1681	Hinger	Adam	Adam	Caroline	Koerner <i>Kürner</i>
1681	Hinger	Margaretha	Adam	Carolina	Koerner <i>Kürner</i>
1681	Hinger	Christina	Adam	Carolina	Koerner <i>Kürner</i>
1681	Hinger	Rosina	Adam	Carolina	Koerner <i>Kürner</i>
1681	Hinger	Adam	Adam	<i>Karoline</i>	Koerner <i>Kirner</i>

In the records in the example above, the standard spelling of Hinger used for sorting and grouping is always the same as what is found in the record. However, within these records, the mother’s maiden name, Koerner (standard spelling), is spelled differently in these records as Körner, Kürner, and Kirner, shown in *smaller italicized* font below the standard spelling in **larger bold** font. In the last record, the actual spelling of the mother’s *Vornamen*, Karoline shown in **red-bold-italic** font, is different from what was previously reported in other extractions for this record. As many people come to understand when researching these German records, the spellings are notoriously inconsistent. Sometimes these variant spellings represent differences in the way the name is pronounced by the person writing the name. For example, Dewald and Theobald are the same name, as are Emilia and Amalia. Sometimes the person has multiple *Vornamen* where any combination could be used in various records.

pb#. Included in most birth, marriage, and death records found in the baptism, marriage, and death registers is a unique number assigned to any **accepted family** of the village in the *Personalbuche* (family book) maintained for the village or *Kirchspiel*. The title to this field found in the baptism and marriage register is *Pagina im Personalbuche* (page in the family book). These unique numbers for any given family changed over time when a new family book for the village was started.

Unfortunately, the actual family books for the Glueckstal colonies have not been found. But we can possibly use the reported pb# found in the baptism, marriage, and deaths registers to assemble families that are difficult to group due to similar names between families. These files, unlike the prior extractions, report this number, referred to as a pb#, if given in the register in a dedicated field for ease of comparison. Where no number is given, these files will show a “—”.

It is assumed pb# is absent from the record for at least two different reasons. Some families listed in the register simply were not recorded in the family books because they had not gained accepted colonist status. They were either *Ausländer* (foreigners) or were accepted members of another colony. However, in some registers, all entries lack a pb#, regardless of whether the family was recorded in the village’s *Personalbuche*. Where entire registers lack pb# for all entries, it may just mean the person copying from the original register just neglected to copy them to what was reported to St. Petersburg. Because the absence can be for more than one reason, this means that it cannot be assumed that an absence of a pb# in these files necessarily means that the family was not accepted by the village or does not appear in the *Personalbuche*.

Also, in reviewing the pb# for any family group in the birth and marriage records, non-conforming numbers are often present. Non-conforming meaning numbers are entirely different from numbers on records of other events for this family occurring before, after, or both before and afterward. Possibly this represents a copy error from the original. It appears transposition errors or miscopying from adjacent records occurred. An attempt was made to doublecheck extracted nonconforming numbers extracted from the birth and marriage registers. For these, in the remarks field, the following comment is made: “PB# verified with image.” This means the number was verified and doublechecked to be what is found in the record. It also appears for one year (and possibly into the next) some other number was used other than the page number from the *Personalbuche*. The pb# found in the Glueckstal St. Petersburg records for the year 1861 are almost always non-conforming when compared to both prior and later years. This occurs on any record in these files found on *DGS film #4280514 (src #057)*.

Register description. Unlike the other extractions, these files record the description of the register from where the record was recorded. This description includes the village name, year (reported year to St. Petersburg), and type of record (birth, marriage, or death). The village in the register description does not necessarily match the *Kirchspiel* (parish) name. Usually, there is a title page preceding the register showing this information. However, not every register necessarily has its own title page. For example, the village of Klein Neudorf has its own separate register immediately following the Kassel register, both part of the Kassel *Kirchspiel*. Note the register for Klein Neudorf might begin on the same page/image where the Kassel register ended, either with the *reg #* (entry number for record) restarting, or simply where the births start over from the first of the year. There may or may not be a note indicating a new set of records for another village has started. Where several registers are found on one page, a note is made in the remarks, such as the “DGS image contains entries from two different registers.” What is likely is the original *Kirchspiel* records had more than one register for births maintained separately. But

when reporting to St. Petersburg, the records continued on the same page, not necessarily beginning a new page in the copy.

Age reported in death records. The age extracted and shown in the files is exactly how it appears in the death record, including time in years (y), months (m), weeks (wk), days (d), hours (hr), and/or minutes (min). No attempt was made to calculate or estimate the date of birth based on the age at death.

Status recorded in death records. As noted above, the status found in the record does not always agree with the status assigned for the purpose of sorting the death records. Each death record was assigned to the status of either adult or child based on the criteria expressed above. Within each record, a status is given in the death register, but is inconsistently applied from year to year and from parish to parish. A table is provided at the end of file reporting the death records showing the various words used to report the status of the deceased person.

Remarks. Extensive notes are added in this extraction when compared with the prior three extractions and can be identified with the initials RWS. Some notes from prior extractions are retained but are rather simple including notes such as “stillborn”, “twin”, or “son/daughter” – all of these were verified with the film for correctness.

Pathen (godparents/witnesses) have been added in this extraction to some birth records in the remarks. These could be important in determining familial relationships.

Wherever a special trade/skill is given in the record other than a *Bauer* (farmer), this is included in the remarks. Also noted in the remarks are baptisms occurring outside the village that is represented in the register description – if this location is given. When the head of household is not a colonist from the village represented in the register description, this is included in the remarks if this information is given in the record. He could be a colonist from another village, a subject of another land, or simply given as *Ausländer* (foreigner) as described above.

In many notes, a reference is made to the PoO. The PoO refers to the Points of Origin file published by the GCRA and contains extensive and relevant genealogical data pertinent to many of the records shown in this extraction.

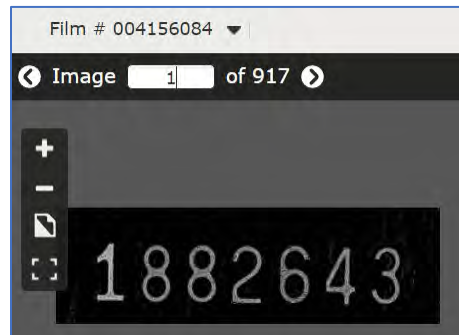

Sourcing to film. Every record in these data was reviewed from the film image and rereviewed at least twice more. As such, numerous errors or changes were uncovered when compared to the prior extractions of the film – as indicated by the **red-bold-italic** font found throughout these data. Thus, for each record an extensive source has been provided, an example from the first record in the data is as follows:

src-item-image	page/reg
old film#	new DGS#
003-1-0220	243/151
1882643	4156084

[link](#)

The St. Petersburg records are found on 135 different digitally stored films, numbered consecutively 1 to 135 in these data with links to each film are to the right of each record (shown above) and at the bottom of the file. In the example above, the link is at *src #003*, or the third link in the list at the bottom of the file. The new number assigned by **FamilySearch** to the digitally stored film in this example is **#4156084**

(referred to as the DGS#), which is an exact duplicate of the old film roll #1882643. This old film number is referenced in the prior extractions but is sometimes in error in the old extractions, as noted in the remarks. Upon following the link to *src #003 (DGS #4156084)*, *image #1* of the film appears as follows:

The first frame or *image #1* of each St. Petersburg film displays the old film roll number, here *old film #1882643*. This film contains 917 frames or digital images. Also, film images are separated or grouped by *item #*, which is not needed to find the image if the image number is known. For the example, the record is found within *item #1*, or first group of images on the film. Films generally are divided into 1 and up to 6 items. *Image #220* contains the record for the example. When viewing *image #220*, this corresponds to page 243 of the register hand-written in the top right corner:

The actual record is at *reg #151*, or the 151st entry in the register (not shown here).

The St. Petersburg records can also be accessed by *volume #* on the **FamilySearch** site. If accessing the records through the volume number, the image number for the volume **will not agree** with image number for the *DGS#*. For this example, the record can be found on *volume #828-14/5A*, *image #17*. The St. Petersburg records can be assessed through a separate indexing by volume at this link: <https://www.familysearch.org/search/collection/1469151>.
